100 Llano St. Aztec, NM 87410 505-334-6411

100 N. Church St. Bloomfield, NM 87413 505-632-3324

Patient Name: _____

DOB: _____

Address: _____

Phone: _____

“The serology test looks for the presence of antibodies, which are specific proteins made in response to infections. Antibodies can be found in the blood and in other tissues of those who are tested after infection. The antibodies detected by this test indicate that a person had an immune response to SARS-CoV-2 (COVID – 19), whether symptoms developed from infection or the infection was asymptomatic.” Per the CDC.

THIS TEST IS NOT MEANT TO IDENTIFY ACTIVE COVID-19 INFECTION

DEPARTMENT OF HEALTH QUESTIONAIR...

7. Current disease states? Heart failure/disease Diabetes Asthma/COPD High Blood Pressure
 Hyperthyroid Cancer Cholesterol Other: _____
8. Current list of medications. _____

I authorize Kare Drug to administer and read the COVID-19 serology antibody test. I understand that this test is not intended to test for active COVID-19 virus infection. I understand that the results for “immunity” are not definite as secondary rates of infection for SARS-CoV-2 are unknown at this time. I understand that a POSITIVE result means that I have been exposed to the virus in the past and that a NEGATIVE result means that I am still at risk for exposure. I authorize Kare Drug to share this information with the New Mexico Department of Health.
